Project description:

Project Summary (max. 1000 characters)

Provide a lay level summary of your proposed research project. This summary might be used for communication and dissemination activities in case your project will be selected for funding. Please make sure that it is publishable.

Project quality and innovation

Describe the following sections:

- *State of the art:* describe your scientific proposal within the framework of the current state-of-the-art, its significance in the field, and why it is timely and relevant within the scope of the Award. Highlight how your proposed research will provide forward-moving steps toward the current state of the problem addressed.
- *Preliminary data:* describe the preliminary data that supports the hypothesis and the scientific approach of the proposal.
- *Project Hypothesis and Objectives:* outline the hypothesis and specific objectives of the project, and how they surpass the current state-of-the-art.

Scientific approach and work plan

Describe the following sections:

- *Methodology and scientific approach:* detail the methods to achieve the objectives proposed.
- *Work plan (activities to be performed):* Please consider the specific duration criteria of each Award.

Letter of Intent

Impact

Describe the following sections:

- *Expected Results: explain the primary expected outcomes and their importance including the scientific novelty and social relevance.*
- *Broader applications of your study.*
- *Results dissemination.*
